

Injury and Accident Reporting System

A OneGroup Proactive Injury Cost-Reduction Program

Timely reporting of injuries saves businesses enormous money. Why, then, don't more businesses do it?

- One week's delay in reporting an injury can increase a claim cost by 10%.
- A claim filed 30 days or more after an injury cost up to 48% or more to settle.
- Soft tissue strains and sprains are 13% more expensive if not reported within 1 week.
- 22% of injuries reported around 10 days after injury are litigated—up to 47% or more are litigated when reports arrive more than 30 days after injury.
- A recent study of strain injuries illustrates how claim costs increase by 30% for every 10-day delay after an injury has occurred:

The solution is ONEGROUP's easy to implement Injury and Accident Reporting System.

OneGroup's standardized Injury and Accident Reporting System helps businesses better manage their claims process to reduce injury reporting lag time. It establishes a "gold standard" for reporting claims: **three days or less** to prevent claim cost escalation.

OneGroup's system facilitates remote-site reporting, process consistency, and expedites medical and claims management. It includes an assessment of your operation, design and implementation of an injury reporting packet customized for your operation, and on-site training sessions for your administrative and supervisory staff.

OneGroup helps you to manage injury costs by teaching your supervisors how to respond, report, inform and assist injured workers at the time of the incident and throughout their recovery. In addition, we collaborate with your HR staff to standardize an effective process unique to your organization.

Call today and begin saving substantial dollars on your injury claims.
